v2.cpp

```cpp
#include<iostream>
using namespace std;
int main(){
    string n="moom";
     int l=0;
     int r=n.length()-1;
     bool ispalindrome=true;
     while(l<r){
         if(n[l]!=n[r]){
             bool ispalindrome=false;
         }

     l++;
     r--;
}
     if(ispalindrome){
        cout<<"palindrome: "<<n;
     }else{
        cout<<"not a palindrome: "<<n;
     }

     return 0;
}
```

```
